DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims ¹¹1-17, drawn to a printed circuit board, classified in class 174, subclass 256.
 - II. Claims 18-20, drawn to a method for preparing a printed circuit board to receive a board level coating, classified in class 427, subclass 487.
 - III. Claims 20-21, drawn to a method for manufacturing a printed circuit board, classified in class 29, subclass 832.

The inventions are distinct, each from the other because of the following reasons:

Inventions (II and III) and I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method steps can be used different processes such as etching or bonding instead of coating dielectric on a printed circuit board.

2. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method for preparing a printed circuit board to receive a board level coating and

invention III has separate utility such as a method for manufacturing a printed circuit board. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
